

SymphonIQ doesn't generate answers. It computes, verifies and cites them.

Born from \$15B in backlog and shaped on live pursuits with the estimators, proposal leads and project teams who use it.

COMPANY	SymphonIQ, Inc.
WHAT IT IS	A governed, single-tenant AI platform for engineering and construction firms.
WHO IT SERVES	General contractors, heavy civil and rail builders, energy and utility contractors, design-builders and engineering firms.
HOW IT WORKS	Every number comes from a calculation tool, every clause traces to a page and paragraph, and an authorized person makes the call.
PLATFORM	Eight specialists from pursuit to closeout, 100+ subagents and 200+ calculation tools, working from one sealed project record (Memory Fabric).
DEPLOYMENT	One private environment per customer, on AWS or in the customer's own cloud. Used in the SymphonIQ app or inside a company's Claude or ChatGPT.
DATA	Nothing pooled, nothing trained across customers, nothing kept if a customer leaves.
IN PRODUCTION	Rail and transit, heavy civil and energy infrastructure work.
CUSTOMERS	Herzog, founding design partner. Jomax Construction, an APi Group company.
TECHNOLOGY	Patented architecture.
LEADERSHIP	Jared Smith, Founder & CEO. Tim Robertson, Chief Operating Officer.
FREE RESOURCES	AI Use Policy for Contractors (PDF and Word), an AI rider for subcontracts, and guides at symphoniq.ai/blog .
